

Documented Success in Distribution

- Reduced active inventory 27% while maintaining industry leading service levels.
- Reduced planning and receiving activity by 24% so team could focus more time on customer support during a slow economy.
- Dropped over \$2,000,000 to the bottom line in less than 12 months from go live.

“GAINS comprehensive error analysis and dynamic forecasting enabled us to effectively anticipate market decline and reduce our inventory investment on the right items, in the right locations, ahead of the economic slowdown. This not only dramatically reduced potential excess, but now has positioned us to have the right inventory, at the right location, at the right customer service level, as the economy comes back.”

– Vice President, Operations
