

## **Gartner Names GAINSystems a Visionary in 2016 Magic Quadrant for Supply Chain Planning System of Record**

### ***Recognition based on Completeness of Vision and Ability to Execute***

Chicago, IL – February 4, 2016 – [GAINSystems](#), a dynamic provider of advanced supply chain and inventory optimization solutions, today announced it has been recognized by Gartner as a Visionary in the Magic Quadrant for Supply Chain Planning (SCP) System of Record (SOR). GAINSystems is positioned in the Magic Quadrant as the highest for Ability to Execute within the Visionaries quadrant, which we believe is a testament to its industry-leading R&D investments.

“Companies often cite our [innovative approach](#) when selecting GAINSystems, and it’s an honor to be recognized by Gartner, the leading industry analyst firm, as a one of the top Visionaries as measured by Completeness of Vision,” said Bill Benton, CEO of GAINSystems. “Our customers value our technology, domain expertise and customer focus which consistently delivers high value and measurable results to manufacturers, distributors, repair operations and retailers around the globe.”

This recognition comes as GAINSystems’ momentum as a rising force in the market accelerates. The company’s expanded product footprint and substantially increased international presence are driving rapid growth.

As the report highlights, SCP SOR is “an area that Gartner finds many companies are investing in to provide a strong foundational planning layer on which to subsequently build their more differentiating and innovating capabilities.”

GAINSystems is known for its holistic, single-solution approach that empowers [customers](#) to concurrently plan across forecasting and demand, sales, inventory and operations planning (SI&OP), as well as inventory and replenishment optimization. By applying powerful stochastic models and genetic algorithms to dynamically optimize complex supply chain interdependencies, error and variability, GAINSystems ensures customers achieve their service levels while maximizing margins and/or minimizing costs.

### **About GAINSystems**

GAINSystems provides proven capabilities for supply chain and inventory optimization that surpass traditional supply chain planning systems. Our concurrent single-solution approach considers comprehensive error and variability across supply, demand and operations producing inventory optimization that dynamically addresses every SKU by location across the enterprise. With our more cost effective methodology, companies such as the Australian Defense Forces, Benco Dental, Broan NuTone, Cessna / Hawker Beechcraft, Officeworks and Sonepar/Hagemeyer consistently see superior results including lower inventories, reduced operating costs, increased plan accuracy and higher service -- ultimately leading to higher EBITDA and/or mission readiness.
