

GAINSystems Customers Share Stellar Supply Chain Results and Guide Product Direction at 15th Annual Research Group Conference

Meeting to Enhance Lifetime Partnerships and Showcase Advanced User Experience

Chicago, IL – September 7, 2016 – [GAINSystems](#), a dynamic provider of advanced supply chain and inventory optimization solutions, today announced that customers including Lawson Products, Entrust Datacard and Textron Aviation will present at the upcoming GAINS Research Group (GRG). In addition, GAINSystems will showcase new and proposed functionality and usability advances to garner customer feedback. This highly interactive annual customer gathering will take place September 22-23 at the University of Chicago’s Gleacher Center.

The GRG agenda includes a mix of sessions applicable to all customers and industry tracks to meet specific needs of GAINS customers. Customers presenting represent a range of industries: Lawson Products is an industrial products distributor; Entrust Datacard makes identity and secure transaction technologies; and Textron Aviation uses GAINS for maintenance, repair and overhaul (MRO).

A tremendously valuable aspect of the GRG is the opportunity for customers to meet one-on-one with GAINSystems experts to discuss their current usage of [GAINS](#). These usage assessment reviews ensure each customer understands how to get the full benefits of leveraging this holistic approach to tame variability in their specific supply chain. Beyond the presentations and one-on-one sessions, the agenda includes opportunities to network with peers and GAINSystems team members.

“The GRG is our way of creating community with and among our customers. It’s also the ideal way for us to get feedback on our roadmap and planned enhancements to our solution offerings. As a relationship-driven company, this is the highlight of our year,” said Bill Benton, CEO of GAINSystems.

This year for the first time, GAINSystems is inviting select members of the press and analyst community to enrich the conversations. After gaining significant recognition for its leadership in the supply chain market over the past two years, GAINSystems is opening the door to this exclusive event to help industry influencers understand how it builds such winning products and lifetime relationships with customers.

About GAINSystems

GAINSystems combines an innovative approach and comprehensive supply chain optimization solutions to think of everything -- delivering amazing results with very little risk. Our holistic approach considers comprehensive error and variability across supply, demand and operations producing inventory optimization that dynamically addresses every SKU by location across the enterprise. With our proven breakthrough methodology, companies such as the Australian Defense Forces, Benco Dental, Broan NuTone, Cessna / Hawker Beechcraft, Officeworks and Sonepar/Hagemeyer consistently see superior results including lower inventories, reduced operating costs, increased plan accuracy and higher service -- ultimately leading to higher EBITDA and/or mission readiness.
